Abstract

The length of the abstract should be within 300–400 words on a single page. The abstract should be formatted for A4 paper with 2.5cm margins on all four sides. The abstract text should be typed single spaced. All papers must be written in Standard English. Use a 14 point Times New Roman Bold font centered for the title of the abstract, and a 12 point Times New Roman font for the text.

NetSys 2019 will feature a hot topic session, to embrace new ideas and proposals that move the networked systems community forward. The purpose of the hot topics session is to present very recent and highly significant results in networked systems and communication networks. The proposed hot topics should be highly innovative, thought provoking and stimulating in terms of content. Ideas can target new research topics, directions and methods that the NetSys community should address. This explicitly includes also recently published papers at top journals (such as TON or CCR) or top conferences (such as SIGCOMM, IMC, MobiCom, CoNEXT, INFOCOM) which are of high interest for the NetSys community.

Submissions will be evaluated by the NetSys General Chairs and TPC Chairs. Papers that were submitted at NetSys 2019 should not be re-submitted to the hot topic sessions.

Submission Procedure

Hot topic proposals should be sent in PDF format to hottopics@netsys2019.org with subject “NetSys 2019 - Hot Topic Proposal”. The submission format has two options:

1. For new ideas, the proposal should provide an extended abstract of one page that outlines the major results, the innovative idea, why it matters to the NetSys community.
2. For papers already published or accepted at top-tier venues, submitting the front page (at least including title, authors, abstract, and publication venue) of the published paper is sufficient.

Idea proposals will be selected based on novelty, innovativeness and likely audience impact. The presentations will be 15-20 minutes per talk (at the discretion of the NetSys organizers). Accepted abstracts will be published on the NetSys 2019 homepage, but not included in IEEE Xplore.

Important dates

Idea submission deadline: December 20, 2018

Notification of acceptance: January 15, 2019
